Left: with optional glass breeze break
Middle: with standard breeze break

Front Air Bubble Leveling

Easily check the balance's level from the front

Dustproof

Balances protect from dust and spills up to IP54 level

Large Square Weighing Pan

Standard large square weighing pan on all models

Internal Calibration (GX only)

The GX internal calibration with an internal mass saves time and money. External calibration requires a great deal of skill, time and an expensive external mass. With our internal calibration with internal mass, there is no downtime while the technician calibrates the balance

- Automatic Self Calibration – Performs self calibration automatically when a change of ambient temperature exceeds the preset temperature range
- One Touch Calibration – Allows quick calibration with one press of the CAL key
- Calibration is essential for accuracy in weighing. For example, in high resolution balances, changes in sensitivity drift can be caused by changes in the ambient temperature. Take the GX 600 for example, the weight might change by $\pm 0.010\text{g}$ with a change of 10°C (Sample's weight: 500g)
- The GX's internal calibration mass is adjusted to an "OIML F1 class level" by the standard balance calibrated with an "OIML E2 class level mass" (The GX's internal calibration mass is not "the standard mass for legal metrology" nor "OIML's level of calibration mass" Instead it is the mass for adjustment)

OIML Calibration Tolerance		
OIML	E2 Class	F1 Class
200g	$\pm 0.30\text{mg}$	$\pm 1\text{mg}$
500g	$\pm 0.75\text{mg}$	$\pm 2.5\text{mg}$
5000g	$\pm 7.5\text{mg}$	$\pm 25\text{mg}$

Clear VFD Display

Easy to see – even in the dark
Wide angle view prevents mistakes

WinCT-Windows Communication Tools

WinCT is Windows Communication Tools Software, providing easy transmission of weighing data from A&D balances to a computer using RS-232C interface
You can quickly collect data into Windows applications in a manageable format limited only by your own computer's capabilities

Data Memory Function

- Format the Data Memory Function for:
- *200 sets of weighing data
 - *100 sets of weighing data with Time & Date
 - *50 sets of GLP Data-Time & Date, Calibration Data, ID number and Serial number
 - *20 sets of Unit Weight for Counting Mode

GLP/GMP/ISO Compliance

Connecting to a printer, Standard Time & Date Function complies with GLP and Interval Weighing in the Data Memory Function

Standard RS-232C Interface

Using a USB/RS-232C Converter, you can transfer data between a USB equipped PC and multiple GX/GF balances
This also makes your GX/GF balance hot-swappable-no need to turn the balance and computer off before disconnecting the balance

Multiple Weighing Units & Programmable Unit

Uses Programmable or standard units of measure (g, ct, dwt etc.)

Interval Time Setting

Weighing intervals of 2, 5, 10, 30 seconds and 1, 2, 5, 10 minutes in the Data Memory Function

Time & Date

Standard Time & Date Function complies with GLP and Interval Weighing in the Data Memory Function

Auto Self Checking

Automatically checks itself when setting the Automatic Adjustable Environment

Auto Power On Function

Plug it in and it turns itself on without pressing the ON/OFF key

Animal weighing

By holding the average of measurements, it allows you to weigh animals easily

Commands

A PC can control the balance by sending commands to the balance

- Commands to query weighing data
- Commands to control the balance
- Commands to control the memory function
- Commands to control the comparator function

Front Air Bubble Leveling

Easily check the balance's level from the front

Auto Re-Zero Function

Re-Zeroes automatically after data output

ID Number

The balance ID number can be set. It is used to identify the balance when GLP is used. The ID number is memorized and maintained once it is fixed, even if the AC adapter is removed

Display Auto Power Off Function

Display turns off after 10 minutes of inactivity (can be disabled when not used)

ACAI Counting Function

Automatic Counting Accuracy Improvement continuously recalculates and updates the average piece weight, ensuring optimum count accuracy even with very small parts

Comparator Display

The results of the comparison are indicated by HI, OK, LO on the display

Quick Reference Card

A fast, convenient operating guide installed at the bottom of the balance

Splash Proof Keyboard and Display

Balances protected from dust and spills up to IP54 level

Large Square Weighing Pan

Standard large square weighing pan on all models
